Java Spring Framework Spring Boot Spring Security Spring Data Jpa Hibernate ORM RabbitMQ Apache Kafka
PostgreSQL MySQL Git JUnit Linux Docker Lombok JDBC HTML CSS ООП Английский B2

Experience -1 year 11 months

Y LAB, Java-Backend, Moscow, January 2023 - January 2024 (1 year 1 months)

- by implementing external merge sorting, improved the performance of PostgreSQL data service by 20%;
 - Developed asynchronous microservices to implement message censorship (profanity filtering) using RabbitMQ;
 - CRUD and REST API functionality;
 - Development of new functionality, refinement of existing functionality, refactoring, code optimization and code review;
- Stack: Java, Maven, Spring Boot, Hibernate, Spring Data JPA, Spring Security, Git, RabbitMQ, JUnit, PostgreSQL.

ООО "ИHKOP", Java-Backend, Business Process Reengineering, Kazan, July 2022 - January 2023 (7 months)

- improved system efficiency by more than 25% by optimizing multithreading, resulting in lower response times;
 - integrated the mobile application with the API of the website that provides up-to-date class schedules. Implemented processing and structuring of data received from the API using Java and libraries for network queries;
 - performed application performance analysis and optimization, implementing code and database improvements;
 - participated in architecture decisions, process optimization, and technology stack selection. Applied SOLID principles and design patterns to ensure code cleanliness and stability;
 - implemented automation of application deployment and management using docker-compose;
 - Participated in a business process re-engineering project to improve efficiency and reduce costs. Analyzed current work processes, identified bottlenecks and developed strategies to optimize them;
 - review, development and maintenance of microservices;
- Stack: Java, Spring Boot, Spring Security, Spring Data Jpa, Hibernate, MySQL, PostgreSQL, Git, Linux, RabbitMQ, Docker.

Marketing Agency Crystal, Web-master, St. Petersburg, January 2022 - April 2022 (4 months)

- implemented an RFP system;
 - created many websites, landing pages for customer organizations;
 - implemented SEO, which increased the visibility of the site in search engines;
 - working with Wordpress content (pages, records, creating forms);
- Stack: Java, PHP, JS, HTML, CSS, JQuery, WordPress.

Education

«KSPEU» –Software of computer hardware and automated systems, Bachelor's degree, 4th year;

More info

Projects:

- **VehicleHub** –Vehicle management

Description: is a web-based application for efficient vehicle management in modern conditions. The project is designed to meet the needs of fleet owners, logistics companies and enterprises.

Main functionalities: vehicle registration and identification, monitoring, route optimization, reporting, data collection system, analytics.

[Project repository](#)

Technology Stack: Java, Spring Framework(MVC, Boot, Data Jpa, Security), Hibernate ORM, PostgreSQL, Bootstrap, JS, Thymeleaf.

- **Web Library** –Digital Library

Description: Web application for managing the main functions of the library and controlling its stages of work (work with stock items,

customer and staff management). [Project repository](#)

Technology Stack: Java, Spring (MVC, Boot), Spring Validator, JdbcTemplate, DAO, PostgreSQL, Thymeleaf, HTML, BootStrap.

- **Fraud Detection** – Search for fraudulent banking transactions

Application for tracking fraudulent banking transactions within the IT-track of the case championship from Sber. Analyzes JSON file with information on bank transactions and identifies insecure ones corresponding to fraudulent transactions. [Project repository](#)

Technology Stack: Java, Git, JDBC, PostgreSQL, Maven.

2023 год:

- held a 14-day mitap on the topic of IT technologies in tourism in St. Petersburg from the educational program «[Российское Гостеприимство: Организация Экскурсионного Обслуживания](#)»;
- successfully completed a virtual internship in Java at Sberbank;
- flew to the USA on an international student exchange program to improve his English level

Passionate about constantly learning new technologies, foreign language to expand his professional competencies.

Tests, exams, certificates

- **Java Intensive** (Y_LAB, Java, 2023)
- **Java Intensive** ("Школа 21" | L'ecole 42, Java, 2023)
- **SQL Intensive** (ДВФУ, SQL, MySQL, 2022)
- **Accelerator program for technological entrepreneurship** (НИУ МЭИ, Первый Стартап, 2022)
- **Yandex Academy** (Платформа Stepik, C++, 2021)
